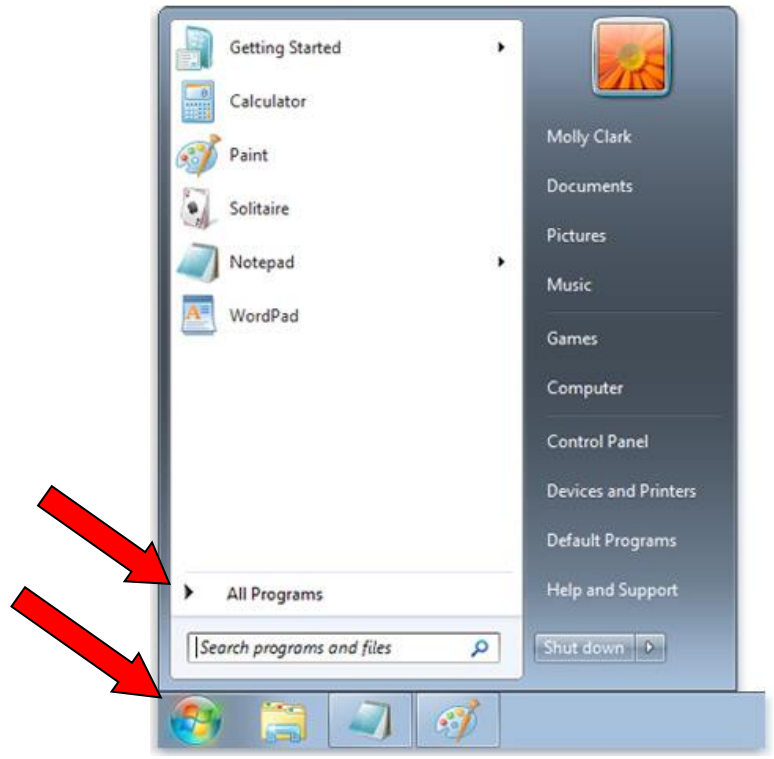
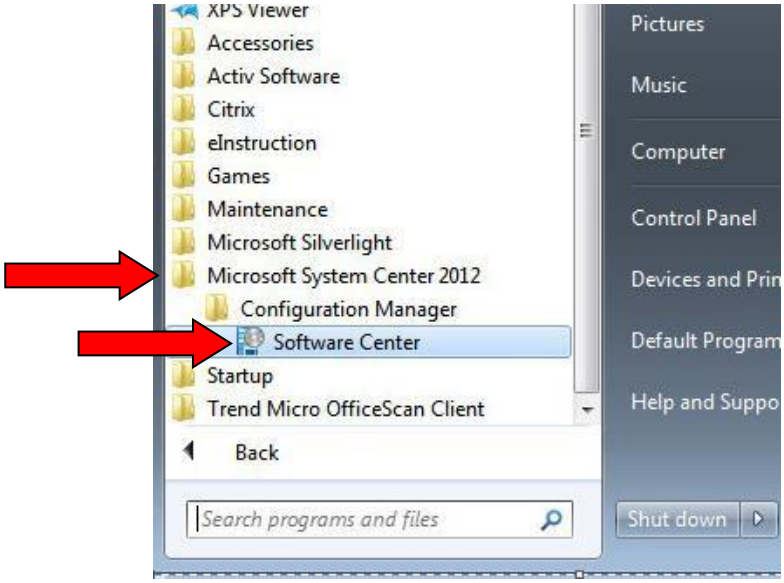
HCS Microsoft Software Center User Manual

The HCS Microsoft System Center helps IT to easily and efficiently push out software applications, Pearson content, and other programs in a cloud environment. In order to access the installed programs, you must complete the install on the HCS network and not from home.

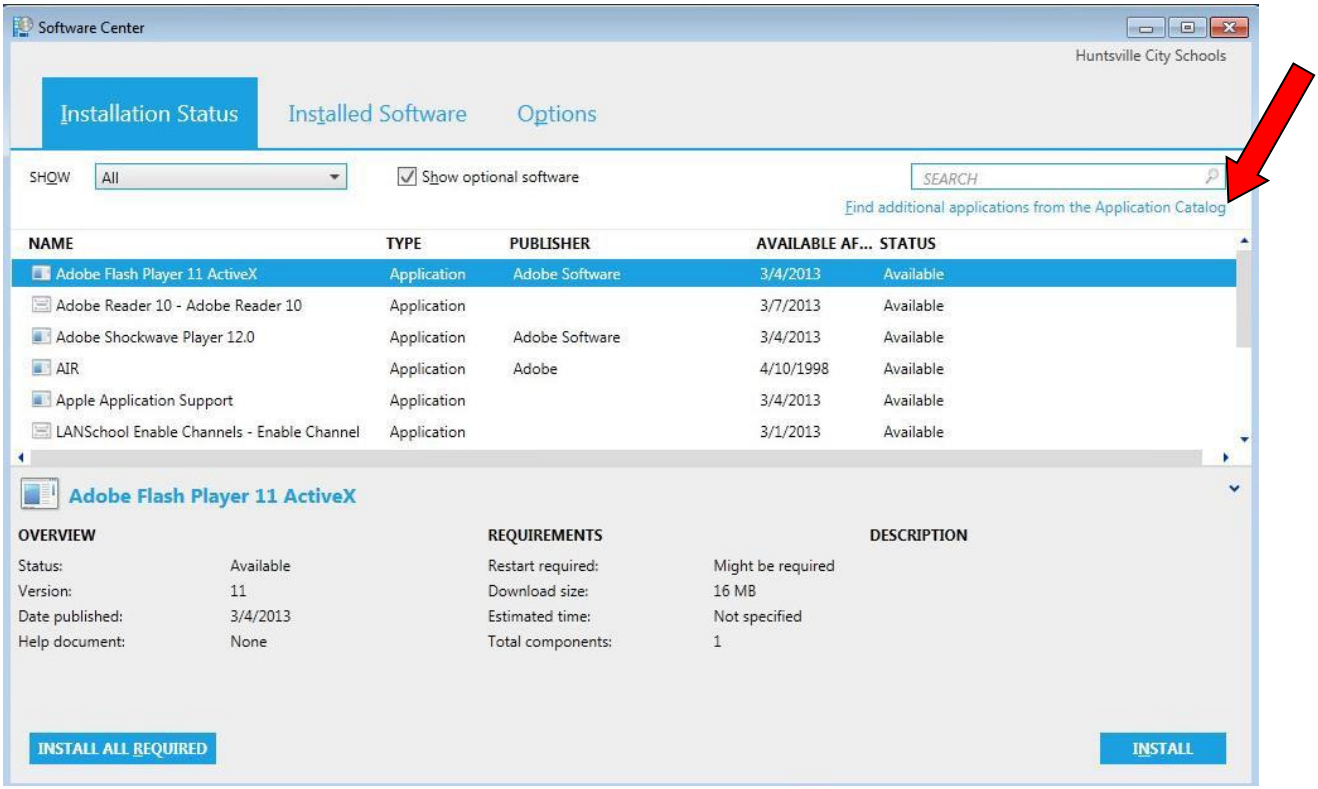
To access the HCS Software Center, open the Windows **Start Menu** and click on **All Programs**.



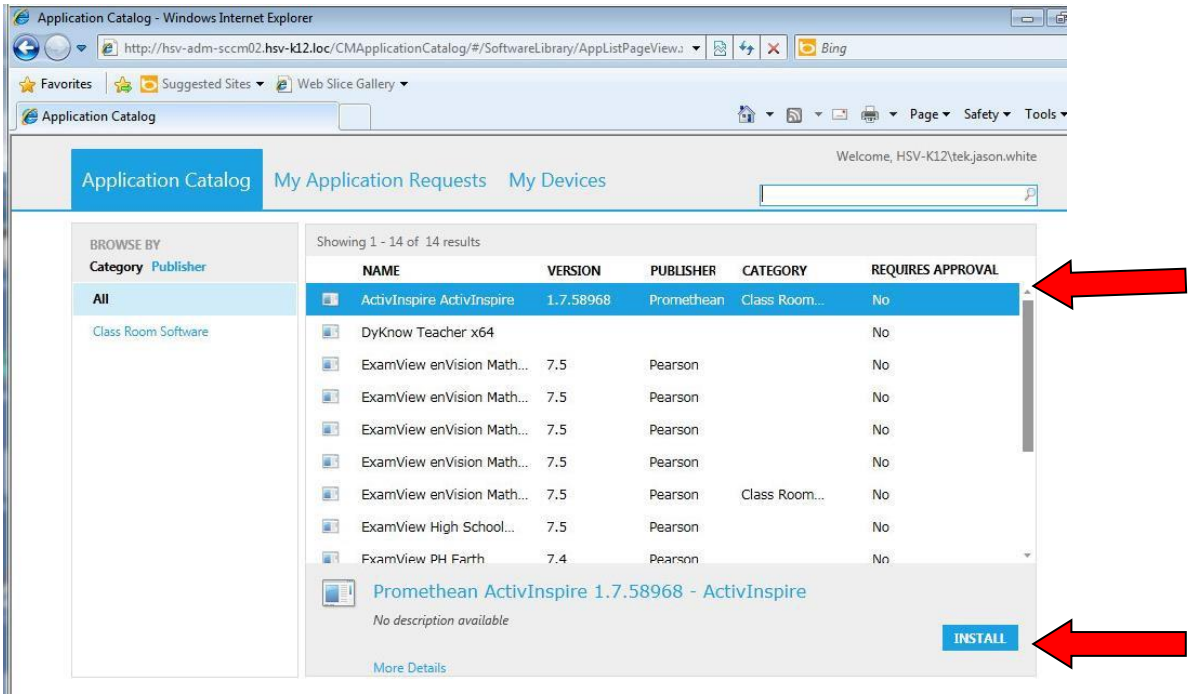
Click **Microsoft System Center 2012**, then **Configuration Manager** and then click on the **Software Center. A screen may pop up requesting a username and password. Enter the same username and password that you use to log in on your HCS laptop.**



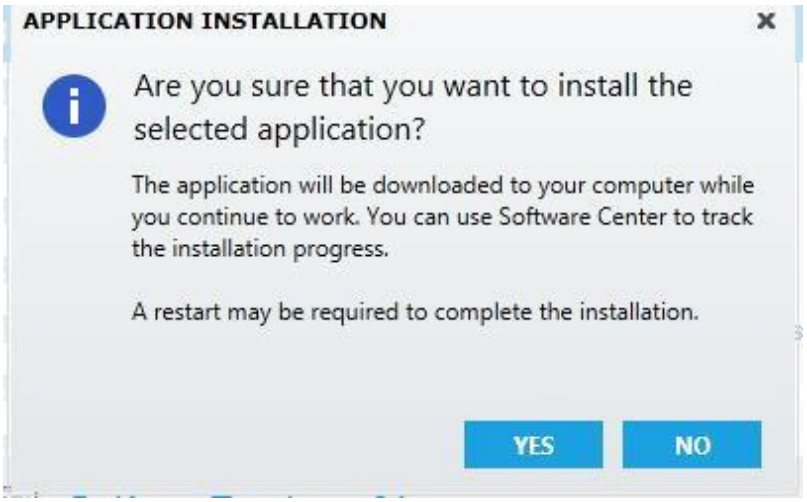
Once the **Software Center** opens, you will see some of the applications that have been pushed to your computer. In the upper right corner under the search box is a link **Find additional applications from the Application Catalog.** Clicking this link will take you to a website with a list of all software that is available.



Once at the site, you will see all software that has been made available for install. To request additional titles added to the catalog, please contact the HCS Helpdesk. To install the software, **highlight the title** of the application and click on the Install button in the lower right corner of the screen.



You will then get a confirmation message. Click **Yes** to begin the install.



APPLICATION INSTALLATION
Are you sure that you want to install the selected application?
The application will be downloaded to your computer while you continue to work. You can use Software Center to track the installation progress.
A restart may be required to complete the installation.
YES
NO

Depending on the software title selected, additional windows may open. Follow directions on the screen to complete the install.

Items Installed in the HCS Software Center:

DyKnow (Teacher) – This is the install that is required for you to use DyKnow Monitor (only required for teachers of grades 3-12). This install will require a restart after install.

ActivInspire: Software required for your Promethean Board

ActiView Driver: Software required for your Promethean ActiView

ImageMate: Software required to use your Elmo

Pearson Exam View: This program is a test-generator resource.

Please contact the HCS Helpdesk with any questions at 256-428-6900.
